Dear Sir:

In response to the Office Action dated March 18, 2003 (Paper No. 25),
please amend the above-identified U.S. patent application as follows:

In the Claims:

32. (Thrice Amended) An element for electrically connecting an electrode connected to a lamp to a wire having an exterior sheath and a conductive core, comprising:

a body having first arms for pressing and securing the wire, said body further having second arms for pressing and securing the conductive core; and

a clamping part having a snap-fit part that is snap-fitted substantially perpendicular to a longitudinal axis of the lamp and integrally extending at an angle from said body, said clamping part for pressing and securing an end of said lamp and the electrode of said lamp.
